

Renovation Checklist

Your renovation guide, helping you identify
and plan your renovation project to save you time and money!

INTERIOR

BUILDING
CO

How to use this checklist....

This checklist will guide you through each room and assist in identifying what you want to replace, renovate or remove – you can customise each room by simply adding items in yours space. You can add the smallest features of each room (like a power point or skirting board), which will help you document the detail of your home and then you can examine condition it's in.

Taking the time to go through each area of your home, will help you identify potential savings, as well as additional costs you might need to budget for before you start any demolition or renovations.

Every renovation or new project starts with a vision, scrolling through Pinterest or Instagram is very easy to want to do everything, unless you have an unlimited budget (which no one does) the reality is we really cant afford to renovate every part of there home at once or if you do careful planning is required.

Our Renovation checklist is the ultimate tool when it comes to pre-planning. Planning is critical and will help your project run smoothly once the time comes to begin your project.

Tip

The more you change, the more it will cost!

Once you have identified areas the require attention, wait at least three weeks before commencing your renovation to ensure you are still 100% happy with your design!
